

Roundup Ready® Herbicide with PLANTSHIELD® by Monsanto

MAXIMISE YIELD POTENTIAL.

Roundup Ready® Herbicide with PLANTSHIELD® by Monsanto is specifically designed to control annual and perennial weeds, both before and after planting Roundup Ready cotton. It can be applied over the top of cotton containing the Roundup Ready trait with a high level of confidence that crop safety will be maintained. Combined with Roundup Ready crop technology, Roundup Ready Herbicide with PLANTSHIELD by Monsanto provides safe and effective weed control.

INCREASED MANAGEMENT EFFICIENCIES

A wider application window provides an even more useful tool for growers to control weeds, in partnership with the use of residual chemistry and cultivation.

LOW DRIFT FORMULATION

Roundup Ready Herbicide with PLANTSHIELD by Monsanto is specially formulated to reduce spray drift and limit off target application.

EASY TO USE

The powerful 690g/kg glyphosate is completely water-soluble and doesn't require any additional surfactant, so it's easy to mix and use. Roundup Ready Herbicide with PLANTSHIELD by Monsanto is registered for aerial application.

OUTSTANDING CROP SAFETY

Roundup Ready Herbicide with PLANTSHIELD by Monsanto is made in a dedicated glyphosate-only production facility which meets Monsanto's manufacturing specifications and quality assurance testing, avoiding the risk of contamination, providing a high level of crop safety. It is the only product with patented PLANTSHIELD crop-safener technology protecting your crop in a wide range of conditions.

Roundup Ready Herbicide with PLANTSHIELD by Monsanto

APPLICATION

Roundup Ready Herbicide with PLANTSHIELD by Monsanto offers enormous flexibility. It delivers the convenience of treating weeds whenever they become a problem.

All applications must comply with the application guidelines on the Roundup Ready Herbicide with PLANTSHIELD by Monsanto label. Care also needs to be taken to ensure the correct seed is planted into the appropriately designated field. Roundup Ready Herbicide with PLANTSHIELD by Monsanto will have a broad spectrum weed control effect on conventional cotton crops.

Roundup Ready Herbicide with PLANTSHIELD by Monsanto may be applied to Roundup Ready Flex cotton crops as an over-the-top application from emergence through to 22 nodes. At this stage, up to four applications can be made (maximum of 1.5kg/ha per application). A pre-harvest application can be made once the crop has reached 60% boll open stage, however the total amount applied per season must not exceed 6.0kg/ha.

Key points:

- Total of all applications in any one crop must not exceed 6.0kg/ha.
- Up to 4 applications may be made over-the-top in any one crop.
- Any single application must not exceed 1.5kg/ha.
- A single application may occur between 60% boll open and harvest.

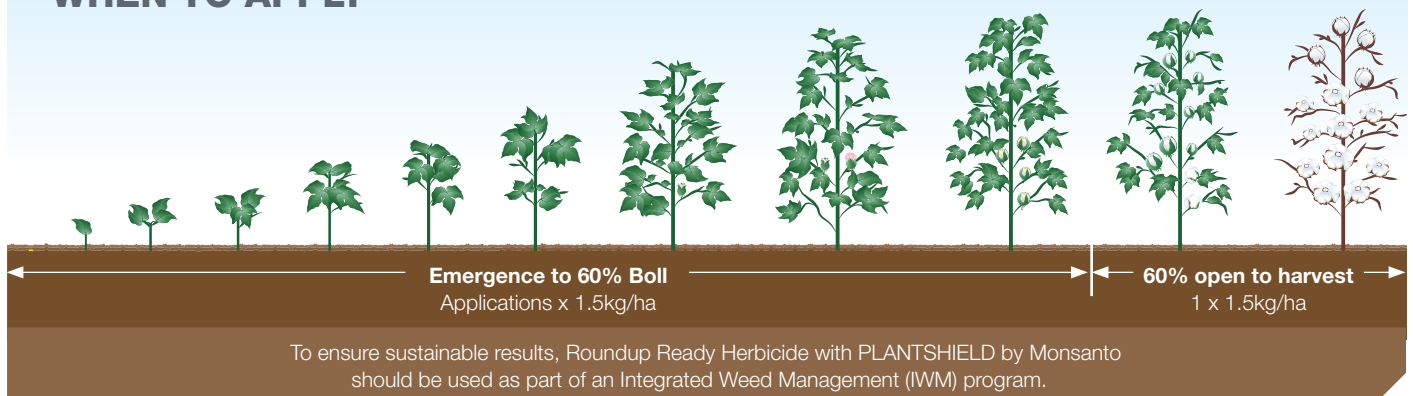

Monsanto will not warrant the use of, and disclaims all responsibility for, any other glyphosate herbicide over-the-top of Roundup Ready Flex cotton crops.

A combination of residual herbicides and other weed control techniques should be used as part of a balanced weed management program.

More information on weed management can be found on the WeedSmart website: www.weedsmart.org.au

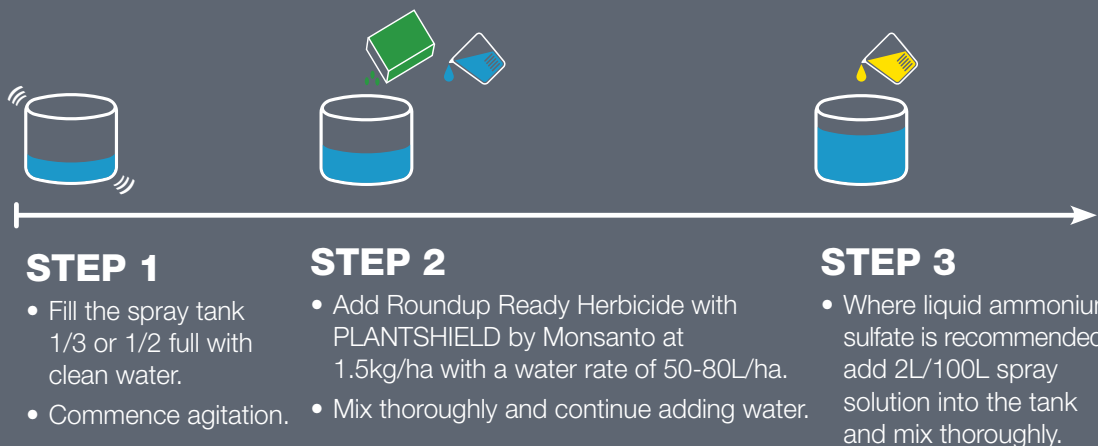

WHEN TO APPLY

Max 4 applications
