

One of the Highest Loading Haloxyfops in the Australian Marketplace

KELPIE® HALOX-F 900EC is a high load 900g/L Haloxyfop herbicide for post emergent control of grass weeds in broadleaf crops. Kelpie® Halox-F 900EC is a group A herbicide with an acetyl CoA carboxylase inhibitor mode of action.

This versatile, highly effective herbicide has broad label registrations one of the highest loading Haloxyfops in the Australian marketplace and reduced hydrocarbons providing reliable results in Australian conditions.

KELPIE® HALOX-F 900EC PRODUCT FEATURES

Reduced Hydrocarbon Loading, Packaging and Handling

The 900g/L high active loading provides a major reduction in hydrocarbon solvent loading, and when compared with the industry standard of 520g/L in an Emulsifiable Concentrate allows for less handling.

Translocating Active

KELPIE® HALOX-F 900EC is a highly translocated and selective grass herbicide; effective on a broad range of annual and perennial grasses including both temperate and tropical species.

Broad Spectrum Weed Control

KELPIE® HALOX-F 900EC is effective against a broad range of weeds including Annual Ryegrass, Barley Grass, Wild Oats and Storksbill.

Compatibility (for non-aerial application only- refer to label for aerial application compatibility)

KELPIE® HALOX-F 900EC is tank mix compatible with:

- Insecticides: Dimethoate, Endosulfan, Lorsban* 500 EC Insecticide, Lorsban* 750 WG Insecticide, Omethoate.
- Herbicides: Atrazine, Basagran, Aciflourfen, Flumetsulam, Clopyralid, MCPA Ester (LVE) – DO NOT exceed 700 mL/ha of MCPA LVE, Oryzalin, Clethodim 240 g/L, Simazine, Fluroxpyr.
- Fungicides: compatible with Mancozeb.
- Trace elements: magnesium sulphate, zinc sulphate.

KELPIE® HALOX-F 900EC is not compatible with 2,4-D or MCPA as sodium or amine salts.

Always refer to plant back restrictions on the label of the tank mix partner.
